

CALL FOR PAPERS

Institute of Economics of the Ural Branch of the Russian Academy of Sciences
supported by
Ministry of Digital Development and Communications of the Sverdlovsk Region
Ministry of Industry and Science of the Sverdlovsk Oblast
Sverdlovsk Regional Union of Industrialists and Entrepreneurs
Commission for Science and Development of the Digital Economy
of the Public Chamber of the Sverdlovsk Region

**Dear Colleagues,
We are pleased to invite you
to the 6th International Scientific Conference
“Digital Transformation in Industry:
Trends, Management, Strategies” (DTI2024)**

Digital Transformation in Industry

**In 2024, DTI Conference is held in conjunction
with IT-Congress and the exhibition
«Forum of the Future»**

Purpose of DTI Conference: evaluate opportunities and prospects for digital transformation in industry and industrial markets, create an idea of introduction mechanisms for digitalization processes, substantiate successful strategies of digital transformation in sectors and at industrial enterprises.

DTI 2024 is focused on the assessment of the Artificial Intellect (AI) development in industry as the main trend of digital transformations in the coming decades. This new trend requires expert assessment of the effects, challenges and development barriers, as well as the determination of national public policy.

**23-25,
October
2024**

The conference will include business and scientific modules.

The business module in the form of round tables will include a discussion and exchange of best practices of digital transformations in industrial enterprises. The business module will be a part of IT-Congress and the exhibition “Forum of the Future” <https://forum-future.ru/>.

The research module will include the plenary section “**Artificial Intellect in industry: effects, barriers and the directions of the national policy**” and scientific sessions on a wide range of problems of the digitalization in industry and economy.

Business and scientific events will be organized in leading scientific organizations and partner universities as a part of DTI 2024.

The main scope is the following:

- directions of use AI in industry;
- cross-industry potential for the use of AI;
- AI technology markets for industry;
- best practices of digital transformations in industry;
- best regional practices for using AI in industry;
- strategies and models of digital transformation of industrial companies;
- industrial policy priorities for digital transformation;
- environmental and social values in the context of digitalization in industry;
- technological sovereignty and digital transformation of industry;
- human capital, digital skills and labour market

Experts in economic, technical and engineering sciences are welcome to participate in the Conference
